TECHNICAL SKILLS

Languages: JavaScript (ES6+), TypeScript, HTML, CSS/SASS, SQL, Python, Ruby

Frameworks & Libraries: React, Next.js, Node.js, Express.js, Redux, GraphQL, FastAPI, Ruby on Rails, Bootstrap, MUI

Testing & Tooling: Jest, Vitest, React Testing Library, Storybook, Git/GitHub, CI/CD (GitHub Actions, Jenkins), Pytest, Hypothesis, Amplitude, A/B testing

Databases & Cloud: PostgreSQL, MongoDB, Redis, AWS (S3, EC2, RDS), Snowflake, Prisma

Talk: [Introduction to React Hooks \(2023\)](#)

EXPERIENCE

Chartbeat | *QA/Software Engineer Intern* June 2026 – Aug 2026

- Shipped a recirculation sorting feature end-to-end across Chartbeat's React/TypeScript dashboard, Python/FastAPI data service, and Snowflake SQL queries, unlocking a new content ranking signal for 50+ publishers
- Introduced the first automated merge gate for Chartbeat's Conversions dashboard by integrating a Dockerized Playwright smoke suite into Jenkins CI, covering auth, API-driven UI updates, URL state sync, and error handling for a React SPA
- Eliminated a live-data race condition between two independently-pollled Lua backend endpoints, resolving an 80+ reader dashboard discrepancy by consolidating both values into one shared computation pass in React
- Developed property-based and invariant tests for FastAPI services using Python, pytest, and Hypothesis to validate data integrity across Snowflake pipelines while increasing testing coverage by 54%
- Won 1st place overall in Chartbeat's company-wide hackathon, building an internal innovation platform that turns employee ideas into customer-facing prototypes

Glassdoor | *Front-End Software Engineer Intern* May 2025 – Aug 2025

- Increased employer review submissions by 6% by owning end-to-end development of the Add New Company feature inside the company survey flow, using React reducer patterns and custom GraphQL queries/mutations
- Drove a 102% increase in total survey submissions by architecting A/B test infrastructure with Amplitude, redirecting employed users from salary surveys to company review surveys during community registration
- Grew test coverage from 0% to 94% across all salary survey modules by authoring type-safe unit and integration tests with TypeScript, Jest, and React Testing Library

Konvene | *Full-Stack Software Engineer* Dec 2023 – Dec 2024

- Designed and implemented 10+ responsive React pages using mobile-first design principles, leveraging MUI to deliver a cohesive, visually consistent user interface/user experience across 3 user roles (vendor/owner/attendee)
- Enabled Stripe payments, event add-ons, and ActionMailer notifications by designing 10+ PostgreSQL tables with Rails model associations, validations, and custom business logic methods

Scribe | *Software Engineer (Open Source - OS Labs)* Sep 2022 – Jul 2023

- Built the core product UI: a React-based code editor that lets developers input GraphQL schemas and instantly generate, edit, and save automated Jest tests
- Engineered Express.js/Node.js backend that parses user-submitted GraphQL schemas into ASTs and generates Jest test suites, including type validation tests, query/mutation mock integration tests and resolver unit tests
- Improved response times by up to 80% by implementing server-side Redis caching for API requests, reducing redundant database queries at scale

PROJECTS

Freelance Web Development Present

- Building Next.js/React sites for small-businesses/personal brand clients from requirements through deployment

Blurtz Present

- Building a study SaaS that combines focus timers, active recall, and AI comprehension scoring using Next.js, TypeScript, Prisma, PostgreSQL, Clerk, Stripe, and OpenAI

CSE Society Aviation Hack 2023 | *1st Place Overall (100+ participants)* 2023

- Led a 72-hour sprint to build and ship an aviation-themed game in React, winning 1st place among 100+ individual participants

EDUCATION

University of California, Riverside | *Bachelor of Science* | *Cum Laude*
