TECHNICAL SKILLS

Languages: JavaScript (ES6+), TypeScript, HTML, CSS/SASS, SQL, Python, Ruby

Frameworks & Libraries: React, Next.js, Node.js, Express.js, Redux, GraphQL, Ruby on Rails, jQuery, Bootstrap, MUI

Testing & Tooling: Jest, Vitest, React Testing Library, Storybook, MSW, Git/GitHub, CI/CD (GitHub Actions, Jenkins), Pytest, Amplitude, A/B testing

Databases & Cloud: PostgreSQL, MongoDB, Redis, AWS (S3, EC2, RDS), Prisma

Talk: [Introduction to React Hooks \(2023\)](#)

EXPERIENCE

Chartbeat | *QA Engineer Intern*

June 2026 – Present

- Unlocked a new content ranking signal for publishers by shipping the recirculation sorting feature end-to-end across Chartbeat's React/TypeScript dashboard and Python/FastAPI data service
- Introduced the first automated merge gate for Chartbeat's Conversions dashboard by integrating a Dockerized Playwright smoke suite into Jenkins CI, covering auth, API-driven UI updates, URL state sync, and error handling for a React SPA
- Prevented dashboard users from seeing a false "no data" error during Chartbeat's 2-hour post-midnight pipeline delay by building a React hook that gates two mutually exclusive UI states without redundant API calls across sibling components
- Developed property-based and invariant tests for FastAPI services using Python, pytest, and Hypothesis to validate data integrity across Snowflake pipelines while increasing testing coverage by 54%
- Fixed broken Python/pytest E2E test infrastructure across Chartbeat's historical analytics service and extended the harness with 7 parametrized cases across 3 APIs to establish regression protection for recently shipped geo analytics features

Glassdoor | *Front-End Software Engineer Intern*

May 2025 – Aug 2025

- Increased employer review submissions by 6% by owning end-to-end development of the Add New Company feature inside the company survey flow, using React reducer patterns and custom GraphQL queries/mutations
- Refactored and migrated legacy autocomplete components from the core Glassdoor frontend into the surveys codebase, consolidating state management and configuration to achieve WCAG compliance and consistent UX across 4 survey workflows
- Drove a 102% increase in total survey submissions by architecting A/B test infrastructure with Amplitude, redirecting employed users from salary surveys to company review surveys during community registration.
- Grew test coverage from 0% to 94% across all salary survey modules by authoring type-safe unit and integration tests with TypeScript, Jest, and React Testing Library

Konvene | *Full-Stack Software Engineer*

Dec 2023 – Dec 2024

- Designed and implemented 10+ responsive React pages using mobile-first design principles, leveraging MUI to deliver a cohesive, visually consistent user interface/user experience across 3 user roles (vendor/owner/attendee)
- Enabled Stripe payments, event add-ons, and ActionMailer notifications by designing 10+ PostgreSQL tables with Rails model associations, validations, and custom business logic methods

Scribe | *Software Engineer (Open Source — OS Labs)*

Sep 2022 – Jul 2023

- Built the core product UI: a React-based code editor that lets developers input GraphQL schemas and instantly generate, edit, and save automated Jest tests
- Engineered Express.js/Node.js backend that parses user-submitted GraphQL schemas into ASTs and generates Jest test suites, including type validation tests, query/mutation mock integration tests and resolver unit tests
- Improved response times by up to 80% by implementing server-side Redis caching for API requests, reducing redundant database queries at scale

PROJECTS

Blurtz | *Full-Stack* | *Next.js 14, React, TypeScript*

Present

- Building a study SaaS that combines focus timers, active recall, and AI comprehension scoring using Next.js, TypeScript, Prisma, PostgreSQL, Clerk, Stripe, and OpenAI

CSE Society Aviation Hack 2023 | *React Game* | *1st Place Overall (100+ participants)*

2023

- Led a 72-hour sprint to build and ship an aviation-themed game in React, winning 1st place among 100+ individual participants

EDUCATION

University of California, Riverside | *Bachelor of Science* | *Cum Laude*
